VISSIM COM DOCUMENTATION

COM introduction

An introduction to the Vissim COM interface with code snippets in various programming languages is provided in the document VISSIM # - COM INTRO.PDF (# stands for the current Vissim version, e.g. VISSIM 8 - COM INTRO.PDF).

This pdf file is located in the folder \DOC\ENG\ of your PTV Vissim installation (default path for 64-Bit edition: C:\PROGRAM FILES\PTV VISION\PTV VISSIM #\DOC\ENG).

We strongly recommend reading this document before working with the Vissim COM interface.

COM help (reference)

The Vissim COM help provides a complete reference of all objects, methods and their parameters and attributes that are available through the Vissim COM interface. This help is easily accessible from the workspace of PTV Vissim at **Help - COM Help**.
